

# Your Foods Co-Op

## Business Opportunity

The purpose of the Food Co-Op program is to provide the community with fresh fruits and vegetables and other food products for cheaper prices and convenience. We buy in bulk and this allows us to get the food products less while making the community more health conscious. Your Food Co-Op is designed to create businesses and job opportunities for those who are seeking a balanced income during this economic crisis. With the unemployment rate at its highest, this is an excellent opportunity for entrepreneurship. Being a member of Your Food Co-Op has tremendous benefits. It allows you to become self-sufficient. A small start-up fee is required with minimal time invested. With as little as ten customers to start, you are already on your way to being successful!
